

CivilTime

CivilTime is a custom subclass of DateTime for XOJO. CivilTime adds a function to get the hour as Civilian Time (12 hour clock based).

You can also get whether its AM or PM, get the name of the day and get the month name.

GetAMPM() As String

Returns either AM or PM.

GetCivilHour() as Integer

Returns the hour based on 12 hour clock.

GetDayName() As String

Returns a day name, either Sunday, Monday, Tuesday, Wednesday, Thursday, Friday, Saturday.

GetMonthName() as string

Returns the current name of the current month.

GetMonthName(MonthNum as Integer) as string

Returns the name of the month passed as in integer.

If an invalid value is passed for the MonthNum, it will default to current month.

v1.0

- Initial Release

**CivilTime is donationware. If you use this, please consider donating. Thank you!
You are free to use it in your apps, I do ask that credit to be given to me in the about screen of your app, if your app uses one, documentation, website, if you have one, and so forth. Something to the effect of "This app uses CivilTime class by Erockus."
Thanks!*
